

Please protect healthy competition within the broadband market and small businesses. We've already seen what happened with deregulation of energy, prices skyrocketed! We can not assume that corporations will remain ethically responsible when their pricing practices go unchecked, we know that the opposite is almost always true. As a consumer I want to keep my right to purchase DSL from a small ISP rather than be forced to buy from large corporations. Please don't let the big fish chow down on the little ones. This is what democracy is all about...please preserve it!
